HOW TO CHOOSE A
COLOUR SCHEME
(WHEN YOU'RE NOT A DESIGNER)

TWO DARK COLOURS
These colours will be used for text and accents. They are dark enough that text could be written with them and still readable.

TWO DARK COLOURS
These colours will be used for text and accents. They are dark enough that text could be written with them and still readable.

TWO LIGHT COLOURS
These colours will be used as backgrounds and accents. They are light enough that text could be written on them and still readable.

TWO LIGHT COLOURS
These colours will be used as backgrounds and accents. They are light enough that text could be written on them and still readable.

ONE BOLD COLOUR
This colour is the core of your scheme. It is bold, bright and eye catching. Choose this colour first.

ONE NEUTRAL COLOUR
This colour will be used in backgrounds and accents. It is necessary to ground your scheme.

ONE CONTRAST COLOUR
This colour will be used to make something stand out. It is necessary to break up your scheme.

REMEMBER
This is just a guide. Many colour schemes that do not follow this pattern still look great.

THINK ABOUT
How you will use your colours throughout your branding materials and website.

TRY THEM
In an image or two to make sure they look great togehter.

ASK OTHERS
What they think of when they see your colours. Make sure they embody your brand.

MAKE SURE
You LOVE your colour scheme before moving forward with it.
